

# Cancer Council WA School Programs

SunSmart and Crunch&Sip

research

prevention

support

# SunSmart Schools

**Why? Projections suggest that over 1 million skin cancers will be treated per year in Australia before the end of this decade.**

# Crunch&Sip

**Why? WA kids aren't eating enough fruit and veg and often don't drink enough water.**

# SunSmart Schools

## What?

The SunSmart Schools program embeds sun protection with curriculum, policy and behaviour change. It's more than 'no hat no play'!

# Crunch&Sip

## What?

The Crunch&Sip programs enables students to eat fruit and vegetables during a set time in the classroom and drink water throughout the day. This is embedded through policy, behaviour change and parent support.

# SunSmart Schools

# Crunch&Sip

## How?

Linking with other agencies has been invaluable for both programs.

WAHPSA provides opportunities to hear of the successes and barriers that similar programs experience.
