

Vaping Bill Advocacy Campaign Stakeholder Toolkit

The Australian Government plans to introduce into Parliament a draft law which, if passed, will end the Australian manufacture, supply, advertising, and commercial possession of non-therapeutic vapes. This means that people with a medical prescription would still be able to buy vapes from a pharmacy and vapes would no longer be in easy reach for young people. To help build political support, Cancer Council WA launched an Advocacy Campaign to urge West Australians to get behind new vapes laws that will finally end the teen vaping epidemic. Whether they are a parent, teacher, health professional or a concerned member of the public, their voice matters now more than ever.

The first wave of the Campaign will appear in market in the West Australian, and digital platforms including social media between 7-17 March 2024. We request your support in sharing our Campaign with your networks during that time to help spread the message. Together, we can make a difference for this and future generations of young West Australians.

Please find below some suggested copy for your social media channels and e-newsletter(s). All campaign assets can be downloaded [here](#).
